SUMMARY

Computer Science & Engineering (Business Systems) undergraduate at VIT-AP University (CGPA 9.37/10, graduating May 2027) with hands-on experience in applied machine learning and full-stack development. Building ML and NLP pipelines for incident severity prediction (ResQAI) and EEG-based emotion classification (NeuroSense AI), alongside a deployed LSTM-based earthquake prediction system reaching ~85% accuracy. Strong foundation in data structures, algorithms, statistics-driven model evaluation, and DBMS, paired with business coursework in strategy and finance. Seeking a Data Scientist, AI/ML Engineer, or Software Developer role.

EDUCATION

VIT-AP University (Vellore Institute of Technology), Amaravati 2023 – 2027
B.Tech, Computer Science and Engineering (Business Systems) | CGPA: 9.37 / 10 | Expected May 2027
Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Financial Management, Business Strategy

Nucleus Junior College, Nandyal — Intermediate (MPC) | 96.2% 2021 – 2023
Good Shepherd English Medium School, Nandyal — SSC | 94% 2021

PROJECTS

ResQAI — AI-Assisted Emergency Response & Decision Support System *(In Progress)*
Python, NLP, Machine Learning, Feature Engineering, FastAPI

- Developing an NLP and machine learning pipeline that converts unstructured emergency reports into structured incident attributes to predict incident severity and response priority.
- Performing data preprocessing, feature engineering, and model training/evaluation to support severity-based prioritization and geospatial resource-matching recommendations.
- Building a FastAPI backend and analytics dashboard to expose model predictions with explainable outputs designed to support human decision-making.

NeuroSense AI — EEG-Based Emotion Recognition *(In Progress)*
Python, PyTorch/TensorFlow, MNE, Explainable AI, FastAPI, React

- Building a deep learning pipeline to classify emotional states (valence, arousal, dominance, liking) from EEG signals using the DEAP dataset.
- Comparing CNN, LSTM, and CNN-LSTM architectures through structured preprocessing, feature engineering, and iterative model evaluation.
- Designing an explainability layer and a FastAPI + React interface to surface interpretable model predictions.

LEADERSHIP & ACTIVITIES

Technical Lead & Event Management Lead — Blockchain Club, VIT-AP 2024 – Present

- Led the technical team; designed, developed, and maintained the official club website used for member sign-ups and event announcements.
- Organized and hosted 15+ technical webinars, coordinating speakers, scheduling, promotion, and participant communication.
- Directed end-to-end execution of 2 hackathons, managing volunteer teams, judging logistics, and participant support.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, TypeScript, SQL
Data Science / ML: TensorFlow, PyTorch, Deep Learning (RNN, LSTM, CNN), NLP, Time Series Analysis, Feature Engineering, Data Preprocessing, Model Evaluation, Explainable AI, NumPy, Pandas, scikit-learn, Data Visualization
Web Development: React.js, Node.js, Express.js, Flask, FastAPI, HTML5, CSS3, Tailwind CSS, REST APIs, JWT Authentication
Databases: MySQL, MongoDB, PostgreSQL
Tools & Platforms: Git, GitHub, Vercel, Google Colab, Jupyter Notebook, Docker, Microsoft Azure, Claude Code, Claude Cowork

ACHIEVEMENTS & CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900) — Microsoft, earned August 2026 | Credential ID: 54B50F6CF6CF104D
- Achieved a district top rank of 465/470 in Intermediate (MPC), reflecting consistent, strong academic excellence.
- Awarded the Student Academic Excellence Award for outstanding academic performance, placing in the top 10 of the department with a 9.41/10 CGPA.
- Certified Member, Blockchain Club, VIT-AP — awarded for active contribution and website development for the club.
